## PRODUCT DESCRIPTION

Kratki's cast iron fireplaces are forged from highest quality cast iron and are built to last Poland's harshest winters. As a result, each unit offers excellent thermal properties and durability.

With very impressive technical specifications, this closed-combustion fireplace is an excellent heating solution for those looking for a more traditional fireplace. Crafted with great attention to detail, the Kratki cast iron range of wood-burning stoves are designed to add an element of timeless, traditional beauty to your interior space.

To guarantee maximum strength, the cast iron is moulded to a minimum thickness of 8mm. This ensures that the fireplace offers excellent radiant heating for your home – even long after the last wood log has burnt down. As an efficient, closed-combustion fireplace, most of the heat generated by the burning wood is released more

effectively into the room for your comfort.

Depending on your preferred aesthetic and installation, this wood-log fireplace allows for both top or rear flue exit. In addition, it comes with a removable ash box for simple and easy cleaning as well as a removable door handle for your safety and convenience.

To improve the safety and performance of the fireplaces, as well as increase their lifespan, the heat-resistant glass Kratki uses is of the highest quality. Thanks to the specialised, air-wash glass cleaning system, the soot deposits on the fireplace glass are greatly reduced.

All Kratki's wood-burning fireplaces come with a 5-year warranty. As a result, you can be confident that your fireplace has been designed with strength and durability at its very core and will last for many years to come.
