CO emissions	0.15%
Colour	Black
Country of manufacture	Poland
Efficiency	71%
Flue pipe diameter	150mm
Fuel	Wood
Heat output	10 kW
Heating capacity	150 – 250m ³
Material	Steel
Warranty	5-year warranty
Combustion technology	Primary and secondary combustion
Door	Standard door
Flue exit	Top

PRODUCT DESCRIPTION

The Kratki Jas fireplace pairs minimalist, contemporary design with the most modern technology in fireplace combustion. This wood-burning fireplace is sure to capture attention with its sizeable glass window that provides a beautiful view of the flames once the fire has been lit. With very impressive technical specifications, this closed-combustion fireplace is an excellent heating solution for anyone looking for a high-performance, modern unit at an economical price point.

While the Kratki Jas can be installed as a built-in fireplace it can, as an alternative, be installed on a ledge as a countertop, freestanding fireplace.

Considering that Kratki fireplaces are built to last Poland's harsh winters, this Jas firebox is manufactured with thick, high-quality steel – which is reflected in its solid weight.

The burn chamber is lined with Kratki's signature ceramics. When it comes to the choice of materials that can be used inside a fireplace chamber, these thick, heat-intensifying ceramics offer the best thermal properties available.

For improved safety and performance, as well as to increase their lifespan, the heat-resistant glass that Kratki uses is of the highest quality. Thanks to the specialised, air-wash glass cleaning system, the soot deposits on the fireplace glass are greatly reduced.

All Kratki's wood-burning fireplaces come with a 5-year warranty. As a result, you can be confident that your fireplace has been designed with strength and durability at its very core and will last for many years to come.
